Duhan Onat Karadayı

Data Analyst · Statistician

Prague, Czech Republic · +420 722 594 034 · duhanonat@gmail.com · linkedin.com/in/iamonat · du0ks.github.io

PROFILE

Statistics graduate (METU) who works with real trade and economic data every day. I build data pipelines on the UN Comtrade API, run scoring models that rank export markets, and turn the results into reports. Previous data science work for the Presidency of Türkiye's HR Office and TÜBİTAK. Strong in Python, R and SQL. Full-time MSc student at ČVUT Prague, available for part-time or hybrid full-time data roles; no work permit needed.

PROFESSIONAL EXPERIENCE

Technical Solutions Lead — **May 2026 – Present**
İnovakademi (foreign-trade training and consultancy) — *Remote · Prague*

- Built a Python pipeline on the UN Comtrade API that extracts 2021–2025 trade data for 80 HS product codes across 8 medical-device sub-sectors, and produces ranked tables.
- Implemented the market-scoring model behind a target-market analysis for a medical-sector export cluster in the Ministry of Trade's UR-GE programme: countries ranked on trade deficit, import demand and Turkish export performance, with deep dives on 17 target countries.
- Prepare sector and macroeconomic analyses from official statistics, and Ministry-facing reports for clients.
- Automate data extraction, cleaning and reporting with Python and AI coding agents (Claude Code, MCP).

Full-Stack Developer & Data Scientist — **May 2025 – Apr 2026**
The Globby (İnovakademi subsidiary) — *Remote*

- Developed an algorithm that identifies country-level trading opportunities for each product from UN Comtrade trade data, using ranking and scoring approaches in Python and R.
- Applied regression, classification, PCA, Random Forest, gradient boosting and time-series methods to trade and economic data for market and opportunity analysis.
- Built data pipelines and analytics dashboards, and automated recurring data collection and reporting; integrated models into backend services on Linux with SQL and Python.

Data Science Intern — **Oct 2024 – Jan 2025**
Human Resources Office, Presidency of the Republic of Türkiye — *Ankara*

- Analysed multiple HR datasets with regression, MANOVA and clustering; delivered models, visualisations and written interpretation in R, Python, SQL and Excel.
- Wrote reusable Excel and R scripts that were adopted by other departments for routine analyses.

Strategic Planning and Management Intern — **Jun 2023**
TÜBİTAK (Scientific and Technological Research Council of Türkiye) — *Ankara*

- Performed statistical analyses of TÜBİTAK project data using regression and non-parametric tests.

EDUCATION

MSc Innovation Project Management — **2026 – 2028 (expected)**
Czech Technical University in Prague (ČVUT), MIAS — *Prague*

BSc Statistics — **Graduated Jul 2026**
Middle East Technical University (METU) — *Ankara*

- Teaching Assistant, Data Analysis for Archaeometry (graduate course): taught R programming and statistical techniques.
- Coursework: regression, hypothesis testing, multivariate statistics, PCA, clustering, time series, sampling, survival analysis, computational statistics, design of experiments.

SKILLS

Programming: Python (pandas, NumPy, scikit-learn), R (tidyverse), SQL, Bash, REST APIs; algorithms and data structures

Statistics & ML: Regression, logistic regression, hypothesis testing, ANOVA/MANOVA, PCA, clustering, time series, survival analysis, design of experiments, Random Forest, XGBoost, ranking and scoring models

Data tools: Data pipelines, dashboards, Excel (advanced), Minitab, Git, Docker, Linux

AI & automation: Claude Code, Anthropic API, MCP, n8n, Microsoft Copilot Studio; LLM evaluation

Languages: Turkish (native) · English (C1, IELTS 7.5) · Czech (beginner)

PROJECTS

brian, live AI assistant — Self-hosted app that turns notes into tasks via the Claude API. Chose the model by building a hand-labelled test set from real notes and comparing model accuracy on it.

Housing price drivers — Scraped real-estate listings from sahibinden.com and modelled price drivers with regression.
