Duhan Onat Karadayı

Technical Project Manager · Business Analyst · AI Adoption

Prague, Czech Republic · +420 722 594 034 · duhanonat@gmail.com · linkedin.com/in/iamonat · du0ks.github.io

PROFILE

Statistics graduate and MSc Innovation Project Management student (ČVUT Prague) who runs technical and AI projects at a foreign-trade consultancy: project manager for an AI module in a clinic data platform, built and launched a learning-management platform end-to-end, produces AI-generated video courses for corporate education and trains SMEs and entrepreneurs on applied AI as an instructor. Also delivers market analyses, UR-GE studies and Ministry of Trade-facing reports. Available for project, business-analysis, consulting and operations roles in Czechia.

PROFESSIONAL EXPERIENCE

Technical Solutions Lead — **May 2026 – Present**
İnovakademi (foreign-trade training and consultancy) — *Remote · Prague*

- Own the company's technical projects end-to-end: requirements, solution design, implementation, deployment and production support.
- Designed, built and launched the SATSO learning-management platform (WordPress, TutorLMS) end-to-end as sole developer: Ubuntu, Nginx, PHP-FPM, security review, SSH, deployment automation and production support.
- Project manager for the AI module of Cordelia, a clinic patient-data platform: scoped requirements with the founders and advocated an API-based LLM architecture over training a proprietary model.
- Produced AI-avatar video courses (HeyGen) and bilingual study materials for corporate education programmes for client companies.
- Instructor of "Applied AI Solutions for SMEs": deliver online training to SMEs and entrepreneurs on using AI in their day-to-day business.
- Work daily with AI coding agents (Claude Code, OpenAI Codex), connected to tools and data through MCP servers, as the core engineering workflow for implementation, testing, automation and infrastructure.
- Prepare market and commercial analyses, UR-GE export-cluster studies and Ministry of Trade-facing reports and presentations for client companies.

Full-Stack Developer & Data Scientist — **May 2025 – Apr 2026**
The Globby (İnovakademi subsidiary) — *Remote*

- Developed an algorithm that identifies country-level trading opportunities for each product from UN Comtrade-type trade data, using ranking and scoring approaches in Python and R.

Data Science Intern — **Oct 2024 – Jan 2025**
Human Resources Office, Presidency of the Republic of Türkiye — *Ankara*

- Analysed multiple HR datasets with regression, MANOVA and clustering; delivered models, visualisations and written interpretation in R, Python, SQL and Excel.
- Worked with Microsoft Copilot Studio on AI assistant use cases within the office's Microsoft environment.

Strategic Planning and Management Intern — **Jun 2023**
TÜBİTAK (Scientific and Technological Research Council of Türkiye) — *Ankara*

- Performed statistical analyses of TÜBİTAK project data using regression and non-parametric tests.

EDUCATION

MSc Innovation Project Management — **2026 – 2028 (expected)**
Czech Technical University in Prague (ČVUT), MIAS — *Prague*

- Coursework: project management, innovation management, financial and strategic management, process and project standards, Six Sigma, sustainability.

BSc Statistics — **Graduated Jul 2026**
Middle East Technical University (METU) — *Ankara*

- Teaching Assistant for a graduate statistics course (R); founding and board member, METU AI Community.

SKILLS

Project & analysis: Technical project management, requirements analysis, client and stakeholder communication, market research, UR-GE export-cluster studies, ministry-facing reports, training design, presentations

AI & automation: Claude Code, Anthropic API, OpenAI Codex, OpenRouter, ChatGPT, HeyGen; AI adoption, prompt design, process automation, n8n workflows, MCP, Microsoft Copilot Studio

Methods: Statistical analysis, hypothesis testing, regression, forecasting, design of experiments, Six Sigma (coursework)

Tools: Excel (advanced), Python and R (advanced), SQL, dashboards, Google Workspace, WordPress/TutorLMS, Git, Minitab

Projects: brian, a Claude-powered mobile and web planning app I designed, built and run in production.
