Duhan Onat Karadayı

Technical Solutions Lead · Software & Infrastructure Engineer

Prague, Czech Republic · +420 722 594 034 · duhanonat@gmail.com · linkedin.com/in/iamonat · du0ks.github.io

PROFILE

Technical Solutions Lead owning web, server and AI projects end-to-end: a production learning-management platform (WordPress/TutorLMS on Ubuntu, Nginx, PHP-FPM), a self-hosted Claude-powered app on Azure, Google Workspace and domain administration. Advanced Linux user (15 years of daily use) who works with AI coding agents as the core engineering workflow; statistics graduate with ML background. Based in Prague; available for engineering, DevOps/IT operations and technical roles.

PROFESSIONAL EXPERIENCE

Technical Solutions Lead — **May 2026 – Present**
İnovakademi (foreign-trade training and consultancy) — *Remote · Prague*

- Own the company's technical projects end-to-end: requirements, solution design, implementation, deployment and production support.
- Designed, built and launched the SATSO learning-management platform (WordPress, TutorLMS) end-to-end as sole developer: Ubuntu, Nginx, PHP-FPM, security review, SSH, deployment automation and production support.
- Executed the company's Yandex 360 to Google Workspace migration and administer Workspace, DNS, email and hosting.
- Work daily with AI coding agents (Claude Code, OpenAI Codex), connected to tools and data through MCP servers, as the core engineering workflow for implementation, testing, automation and infrastructure.

Full-Stack Developer & Data Scientist — **May 2025 – Apr 2026**
The Globby (İnovakademi subsidiary) — *Remote*

- Built data pipelines and analytics dashboards; integrated models into backend services on Linux servers with SQL and Python.
- Automated recurring data collection, processing and reporting workflows with Python and SQL.

Data Science Intern — **Oct 2024 – Jan 2025**
Human Resources Office, Presidency of the Republic of Türkiye — *Ankara*

- Analysed multiple HR datasets with regression, MANOVA and clustering; delivered models, visualisations and written interpretation in R, Python, SQL and Excel.
- Worked with Microsoft Copilot Studio on AI assistant use cases within the office's Microsoft environment.

Strategic Planning and Management Intern — **Jun 2023**
TÜBİTAK (Scientific and Technological Research Council of Türkiye) — *Ankara*

- Designed and developed a work-planning application in Java using object-oriented programming.

PROJECTS

brian — AI planning assistant (live, self-hosted) — Mobile and web app that turns free-form notes into tasks and events via the Claude API; Azure Ubuntu VM, Caddy/HTTPS, passkeys, CalDAV sync; model picked by an evaluation set of hand-labelled real notes.

maverick — Local speech-to-text tool built on OpenAI Whisper, running fully on-device.

Leo Notes (leo-notes.web.app) — Note-taking web app built with Vite and Firebase.

EDUCATION

MSc Innovation Project Management — **2026 – 2028 (expected)**
Czech Technical University in Prague (ČVUT), MIAS — *Prague*

BSc Statistics — **Graduated Jul 2026**
Middle East Technical University (METU) — *Ankara*

- Teaching Assistant for a graduate statistics course (R programming); founding and board member, METU AI Community.

SKILLS

Linux & cloud: Linux (advanced), Ubuntu server administration, Azure VM, Nginx, Caddy, PHP-FPM, SSH, Docker, deployment automation, production troubleshooting, security and code audits

Programming: Python and R (advanced), Bash, SQL, PHP, JavaScript/TypeScript, Java; algorithms and data structures

Web & platforms: WordPress, TutorLMS, React, Node.js, Vite, Firebase, REST APIs, CalDAV, Git/GitHub, Google Workspace, DNS/email

AI-assisted engineering: Claude Code, Anthropic API, OpenAI Codex, OpenRouter, ChatGPT; MCP, n8n, Microsoft Copilot Studio; agentic development, workflow automation, LLM evaluation

Data: Statistical modelling, machine learning, data pipelines, dashboards

Languages: Turkish (native) · English (C1, IELTS 7.5) · Czech (beginner)
